State Street Medical Offices

SANTA BARBARA, CALIFORNIA

15,600 SF | 2013

The State Street Medical Offices consist of six suites converted from an old bank. The building features two full service surgical rooms and a recovery area. The project is MediCal Certified. Abbott|Reed was responsible for renovating the existing structure, including removal of brick to install steel framing for a second floor. The building required special construction to handle the harsh effects of liquid nitrogen along with a certified clean air system. The team exercised imagination in converting a concrete bank vault into usable storage space.
